Your submittal of bids to supply other products or services outside of this specialty(s) will result in the

contracting entity not getting credit for MBE participation in that business transaction.

You are encouraged to become an active bidder in the participating programs of the Statewide and Interlocal Agreement. You must also be aware that some of the participating entities have certification eligibility criteria unique to those of the reciprocal certification network because they have been imposed by their disparity studies. As a result, some program offices may ask you to submit additional documentation before you are eligible to bid as a certified MBE with that jurisdiction or organization.

The Laws of Florida require that the Office of Supplier Diversity be advised of any and all changes in the company's status occurring within fourteen (14) days of the transfer or change taking place. This law is applicable throughout the effective certification dates.

Questions concerning your MBE certification may be direct to this office at (850) 487-0915.

Sincerely,

Office of Supplier Diversity
